

TITLE: Lead Welder
COMPANY: Laser North, Inc.
LOCATION: Baraga, Michigan

DESCRIPTION.

Lead Welder — join the growing team of leaders and innovators at Laser North, Inc. (LNI) in Baraga, Michigan. LNI is a laser cutting and fabrication specialist corporation. As an LNI Lead Welder, you oversee welding operations assuring production schedules are met while maintaining the highest level of safety and quality in our industry. You are a big picture thinker and see what it takes to make the weld department operate efficiently and successfully in a competitive environment. To succeed, you must be highly motivated with an exceptional work ethic, a strong drive to solve problems, and ability to inspire your team to be the best they can be. You possess excellent and effective organization and communication skills, as well as a commitment to superior customer service.

RESPONSIBILITIES.

- Weld complicated weldments where alignments, dimension, and weld quality must conform to drawings/prints.
- Work closely with welding team on a day-to-day basis to solve problems.
- Maintain welding schedules to meet customer demand.
- Provide training to the welding team on processes and blue print reading.
- Use weld fixtures, gauges, and jigs.
- Inspect parts using precision measuring equipment and document inspection data.
- Ensure staff adhere to company quality and safety standards.
- Collaborates effectively with the entire LNI team to assure clear communication.

SALARY. \$19 - \$22 per hour, based on experience.

SCHEDULE. 1st shift working 7am – 3:30pm.

BENEFITS OFFERED. Laser North places great value in the Lead Welder and offers benefits of a performance/success-based bonus, paid time off, paid holidays, safety training, and new hire orientation.

MINIMUM & PREFERRED QUALIFICATIONS.

- 5 years' experience as a welder, ideally in a lead position in a manufacturing environment.
- Possess certification as a welder or have the ability to become AWS certified.
- Strong knowledge and experience applying best weld procedures to practical applications including:
 - ability to setup MIG and TIG welders to optimal settings to ensure proper weld penetration.
 - working knowledge of carbon steel, stainless, and aluminum MIG welding.
- Ability to read and understand prints and weld symbols.
- Excellent time management, organization and communication skills.
- A collaborative style that both inspires, teaches and motivates a team.
- A desire to continually increase your knowledge of the industries we serve and products, services and processes our company can produce.
- Unrestricted right to work in the United States, required.
